

Guide to Dental Detox

STEP 1: Preparing for Detox

Tri-Fortify® Liposomal Glutathione

Open up detox pathways & to bind mercury.*

C-RLA™ Liposomal Vitamin C, plus R-Lipoic Acid

Antioxidant support for gums & potent chelator.*

CytoQuel®

Promote healthy cytokine function.*

STEP 2: Bind & Remove*

ToxinPul™

Bind and remove toxins and heavy metals while also supporting organ health.*

Core Minerals™

Replenish essential minerals lost during detox.

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

STEP 1: Preparing for Detox

Begin 3-5 days prior to appointment, continuing until product is consumed. May continue as part of a daily healthy supplement regimen.

Tri-Fortify® - Open up detox pathways & to bind mercury*

An effective detox protocol requires sufficient glutathione to assist with the neutralization and removal of free radicals during detox. The problem, traditionally, is that the body poorly absorbs glutathione in supplement form. Our unique proprietary liposomal formula has overcome these barriers, providing you with a reliable tool to bolster glutathione levels in your patients. **Tri-Fortify® liposomal glutathione has been clinically researched at Penn State University and published in the peer-reviewed *European Journal of Clinical Nutrition*.** The study demonstrated a 28% increase in intracellular glutathione levels after just 2 weeks of use. Additionally, we measured a 400% increase NK cell function and 25% reduction in oxidative stress.*

C-RLA™ Liposomal Vitamin C, plus R-Lipoic Acid - Antioxidant support for gums & potent chelator*

C-RLA™ offers doctors and their patients a safe, effective delivery system of High Dose Vitamin C and R-Lipoic Acid in one formulation. Each serving contains 1500mg of Vitamin C and 70mg of R-Lipoic Acid in a natural (GMO-free) liposomal preparation. Vitamin C doses above 250mg are very poorly absorbed. High-dose, oral Vitamin C must be delivered via liposomes from natural phosphatidylcholine to be optimally absorbed. Many doctors supplement in-office Vitamin C drips with C-RLA™ so that patients benefit daily from high-dose Vitamin C without stomach distress.

C-RLA's pure bioactive form of lipoic acid, R-Lipoic Acid, supports a healthy inflammatory response and is a potent free-radical scavenger.*

CytoQuel® - Promote healthy cytokine function*

Chronic cytokine elevation leads to an overactive state of inflammation, and this is seen frequently in those with chronic or acute health conditions. Clinically researched CytoQuel® has been developed to promote healthy cytokine activity.*

CytoQuel® research has been published in the peer-reviewed *Journal of Pain Research*, and the research highlights include a 65% pain reduction, 44% sleep improvement, and 10% MMP-9 reduction in just eight weeks.*

Step 2: Bind & Remove*

Begin on day of treatment, continuing until product is consumed.

ToxinPul™ - Bind and remove heavy metals, glyphosate & other toxins*

ToxinPul™ is a multi-function supplement targeting glyphosate and heavy metals detoxification while also supporting essential organ health such as the liver and kidneys. As many detox products rely on excretion through the organs, the processing time may allow toxins to be reabsorbed into the body. ToxinPul™ is formulated to utilize organ and bowel elimination routes, reducing potential reabsorption concerns.

Our formulators selected eight essential detox and organ support ingredients, including European-sourced purified humic acid (70% humic acid vs. standard 30%) for increased binding capacity without the typical humic acid impurities. Additionally, we utilize a highly absorbable form of quercetin, Quercefit®.*

Core Minerals™ - Replenish minerals

Replenish essential minerals lost during detox (*take at the opposite time of day as ToxinPul™*).
