Quercifit® is a registered trademark of Indena S.p.A., Italy

Features & Benefits*

Allergies may develop as a result of many environmental conditions. When exposed to an allergen, the human body produces a natural mast cell activation response. This mast cell activation causes a release of histamine which when released, binds to histamine receptors causing common allergy symptoms.

HistaQuel® combines seven flavonoids shown to support healthy mast cell function by promoting a healthy amount of histamine release, along with herbs shown to block histamine from attaching to receptors via competitive inhibition.

Each Capsule Includes:

Features	Constituents/Actions	Benefits*
Mast Cell Secure™	Fisetin, Luteolin, <i>Perilla frutescens</i> , Quercifit® Quercetin Phytosome®	<ul style="list-style-type: none"> Targeted flavonoid blend supports a healthy mast cell release of histamine Moderates interactions between mast cells and activated T cells. Supports a healthy Th2 release of allergy promoting cytokines IL-4 and IL-5 Supports a healthy IgE mediated release of histamine Highly bioavailable form of Quercetin with 20 times increased absorption compared to standard Quercetin in published research
HistaCheck™	Stinging Nettle Leaf, Black Cumin Seed Extract	<ul style="list-style-type: none"> Promotes a healthy level of histamine to bind to its receptors by competitive inhibition Supports management of a healthy immune system response to allergens
